SUBJECT INDEX

Aberration, monochromatic, human eye, 65
Acuity, variation with luminance in ocular diseases, 264
Adhesives in ophthalmology, review, 217
Ambassis lala (transparent fish), electron microscopic studies of cornea, sclera, skin and fin, 360
Anastomosis, carotid artery to jugular vein, relief of vascular compression of optic nerve, 131
Aneurysms
  internal carotid artery, simulating pituitary tumors, 440
  Leber's miliary, and optic atrophy, 384
Angiography, fluorescein, diffuse malignant melanoma of choroid, clinicopathological report, 163
Anguloincision
  clinical evaluation, indication, results and complications according to Tailor, De Vincentiis and Barkan, 134
  with goniotomy in 200 hydrophthalmic eyes, 135
Anisometropia, presbyopic, 190
Anterior chamber, histopathology after successful implantation of acrylic lens, 18
Antibodies, circulating, to corneal tissue in Mooren's ulcer, 260
Antilymphocyte serum, treatment, sympathetic ophthalmia, 128
Appendicitis, parasitic, and uveitis of indeterminate etiology, 126
Aqueous humor
  and serum, protein and LDH-isoenzyme analysis, study of uveitis, 126
  possible role of cell wall-deficient bacteria in uveitis, 286
Arterial supply, human optic chiasm, 274
Arteries, rat's eye, intra-arterial cushions, 119
Artery, internal carotid, aneurysms simulating pituitary tumors, 440
Arthritis, juvenile rheumatoid, occurrence of iridocyclitis, 70
Atrophy, optic, and Leber's miliary aneurysms, 384
Autosomes, human, progress in mapping, 254

Bacteria, cell wall-deficient, possible role in uveitis, 286
Barriers, hematic and fluid, retina and vitreous body, 361
Bedsonia infections, man, clinical study, recovery sites, 261
Behçet's disease, cyclophosphamide therapy, 285
